

Website name: optcgdeckz

Topic info: I plan to make my topic based on a trading card game that I play called One Piece Trading card game. The card game itself is based on an anime called One piece. I plan on making multiple pages with lists of cards that work with other ones within the trading card game. I also want to add a list of future cards that the game is adding in the future.

Pages: Future cards, 5-6 pages on important card combinations, page on how to play the game, About the card game/anime, A page to add cards for making a deck, 2-3 additional pages if needed

Stored data: Will need to store card data (price, set numbers, name), and any data of cards that are in specific products i.e. card from a specific box is listed under that box.
